

MARCEL DE BOTTON HONORED BY PORTUGUESE PLASTIC INDUSTRY ASSOCIATION

Cascais, Portugal, September 30th 2019 – Last Friday, our Founder, Marcel de Botton, was honored by APIP – Portuguese Plastic Industry Association – in a surprise ceremony during the Portuguese Plastic Federation Annual Summit.

Marcel's contributions to Plastics are tremendous and APIP honored Mr. de Botton's lifetime services to the Industry. He received a trophy to commemorate his role as former President of the Association over more than 25 years.

During the ceremony, the President of the Portuguese Republic - Marcelo Rebelo de Sousa – made a personal call to congratulate Marcel and excused himself of not being present, as he was attending a meeting at the United Nation in NY .

Also, the Portuguese Government expressed its gratitude to Marcel de Botton's long journey and achievement with the presence of Secretaries of State of the Environment and Economy.

Filipe de Botton, our Chairman, accompanied his father for this very important occasion.

As a reminder, Marcel de Botton has always led a very active life, dedicated to both the production of rigid plastic packaging and recycling. At Logoplaste we are privileged to know this great man, who started the company in 1976 as a one-man show.

This tribute is a reminder that great things can be accomplished when you work hard to achieve them.

About Logoplaste

Logoplaste is an industrial group, manufacturing rigid plastic packaging for many well-known global companies, across the food and beverage, personal care, cosmetics, household care and oil and lubricants sectors. Founded in 1976, for over 43 years the company has pioneered in-house manufacturing with the "through the wall" concept, supplying plastic packages "just-in-time" from plants installed directly on the sites of partner clients. Logoplaste currently manages 63 factories, with locations in 16 countries: Brazil, Belgium, Canada, Czech Republic, France, Italy, Poland, Mexico, Netherlands, Portugal, Russia, Spain, Ukraine, United Kingdom, USA and Vietnam. The most up-to-date technologies in injection molding, stretch-blow molding and extrusion molding are used to produce packages across a wide range of market segments. www.logoplaste.com

About Logoplaste Innovation Lab

Logoplaste Innovation Lab partners with companies and entrepreneurs to research and develop the most Desirable, Feasible, Viable and Sustainable Packaging solutions. It offers a complete and integrated breadth of expertise that supports all phases of packaging development, from design and engineering to full industrial implementation. www.logoplasteinnovationlab.com
