

# **LogoUpdate**

Because innovation is always ahead of its time

## **Logoplaste Innovation Lab** IS A **RECYCLASS** CERTIFIED BODY

Logoplaste Innovation Lab, aka iLAB, offers a new added value service by becoming a RecyClass Certified Body.

So, what does this mean exactly?

As a Certified RecyClass Body, iLAB rates the recyclability\* of packaging concepts, new and existing, which includes all the components of the package or the semi-finished package, ex: bottle, cap, tubs, lids, labels, etc.

Qualitative – A-F class ranking, or Quantitative - % assessments can be made.

**With this new service, Logoplaste Innovation Lab is able to help clients achieve their recyclability targets faster, ensuring new packaging meets local requirements.**

Another step towards Logoplaste's sustainability leadership.

\*Recyclability: evaluates the compatibility of plastic packaging with the entire waste management chain, which includes collection, sorting, recycling, and ability of the recycled material of being reused.

LET US TAKE CARE OF ALL YOUR PACAKGING NEEDS
